

SOUTHAMPTON UNIVERSITY HUMAN ID IMAGE DATABASE RELEASE AGREEMENT

Introduction

The goal of our research is to develop new techniques, technology and algorithms for the automatic recognition of humans, part sponsored by the Defense Advanced Research Projects Agency (DARPA) through the European Branch of the US Army. As part of the research programme, the University of Southampton (UoS) is involved in an ongoing effort to collect a database of biometric imagery. The database is meant to aid research efforts in the general area of developing, testing and evaluating human recognition algorithms. The UoS owns copyright of the collection of biometric images and serves as the source for distribution of UoS HumanID image database.

Release of the Database

To advance the state-of-the-art in human recognition, portions of the UoS HumanID image database will be made available to researchers on a case-by-case basis. All requests for portions of the UoS Human ID image database must be submitted in writing to the UoS Principal Investigator. To receive a copy of the imagery, the requestor must sign this document and agree to observe the restrictions listed below. In addition to other possible remedies, failure to observe these restrictions may result in access being denied for any other portion of the UoS HumanID database.

Consent

The researcher(s) agrees to the following restrictions on the UoS HumanID biometric image database:

1. **Redistribution:** Without prior approval from the UoS Principal Investigator, the UoS HumanID image database, in whole or in part, will not be further distributed, published, copied, or disseminated in any way or form whatsoever, whether for profit or not. This includes further distributing, copying or disseminating to a different facility or organizational unit within the requesting university, organization or company.
2. **Modification and Commercial Use:** Without prior approval from the University of Southampton, the UoS HumanID image database, in whole or in part, may not be modified or used for commercial purposes.
3. **Requests for the UoS HumanID Database:** All requests for the UoS HumanID database should be forwarded to the UoS Principal Investigator.
4. **Publication Requirements:** Those seeking to include renderings of more than 10 images from the UoS HumanID image database in any document must first obtain approval in writing from the UoS Principal Investigator. In no case should the images be used in a way that could reasonably cause the original subject embarrassment or mental anguish.
5. **Citation:** Any document that reports on research that uses the UoS HumanID image database must acknowledge its use by including an appropriate citation to
J. D. Shutler, M. G. Grant, M. S. Nixon, and J. N. Carter "On a Large Sequence-Based Human Gait Database", Proc. 4th *International Conference on Recent Advances in Soft Computing*, Nottingham (UK), pp 66-71, 2002
6. **Publications to UoS:** A copy of all reports and papers that are for public or general release that use the UoS Human ID image database must be forwarded to the UoS Principal Investigator.
7. **Indemnification:** Researcher agrees to indemnify, defend and hold harmless the University of Southampton and its Board of Trustees, officers, employees and agents, individually and collectively, from any and all losses, expenses, damages, demands and/or claims based upon any such injury or damage (real or alleged) and shall pay all damages, claims, judgements or expenses resulting from Researcher's use of the HumanID database.

NAME (in capitals)

SIGNATURE and DATE

ORGANIZATION and ADDRESS (in capitals)

Send to UoS Professor Mark Nixon, School of Electronics and Computer Science, University of Southampton, Southampton SO17 1BJ UK, or fax to above at UK (0)23 80594498
